

WLT007 Flexible Graphite Tape

Introduction

Flexible graphite tape is cut from flexible graphite rolls. Graphite tape filler for spiral wound gasket, in-situ pump and valve gland packing, manufacture of graphite packing rings, facing material for cam profile type gaskets, filler for metal jacketed type gaskets. Also we manufacture Crinkled Graphite Tape.

Applications

The flexible graphite tape is used for making various graphite sealing components, graphite braided packing, etc.

Technical data

Item	WLT007
Carbon content %	>98
Sulphur content PPM	≤1500
Chloride content PPM	≤50
Tolerance of density g/cm ³	±0.07
Tolerance of thickness mm	<1.6±0.03; 1.6-3.0±0.05
Compressibility %	≥40(when density is 1.0g/cm ³)
Recovery %	≥10(when density is 1.0g/cm ³)

Standard Size

Thickness: 0.2mm to 1.0mm

Length: 50m, 80m, 100m, 120m

Width: 4.0mm to 600mm
